

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims

1. (Original) A wall mounted domestic combined heat and power appliance comprising a prime mover to generate electrical power and heat output, a housing containing the prime mover, and at least one bracket at each side of the housing to mount the housing to a wall, each bracket comprising a main body which is elongate in a vertical direction and has a L-shape cross section, each extremity of the L-shape cross section having an enlarged portion, a first of which provides a spacer between the main body and the housing, and a second of which provides a spacer between the main body and the wall.

2. (Original) An appliance according to claim 1, wherein a plurality of brackets are provided at each side of the housing.

3. (Currently amended) An appliance according to claim 1 [[or 2]] wherein the prime mover is a linear free piston Stirling engine.

4. (Original) An appliance according to claim 3, wherein an absorber mass is suspended from the Stirling engine.

5. (Currently amended) An appliance according to claim 1 ~~any one of the preceding claims~~ wherein the housing is provided with at least one flexible inlet/outlet connection for fluid.

ATTORNEY DOCKET NO. 02157.0020U1
International Application No. PCT/GB2003/003516

6. (Original) An appliance according to claim 5, wherein the flexible connection is provided by an oversize opening in the housing through which an inlet/outlet pipe extends, and a flexible seal between the hole and the pipe.

7. (Currently amended) An appliance according to claim 5 [[or claim 6]], wherein the inlet/outlet is provided with a flexible pipe section to absorb pressure pulses.

8. (New) An appliance according to claim 6, wherein the inlet/outlet is provided with a flexible pipe section to absorb pressure pulses.

9. (New) An appliance according to claim 2 wherein the prime mover is a linear free piston Stirling engine.
